Glass Northampton Limited Environmental Policy

Glass Northampton is committed to protecting the environment by complying with all legislation, meeting National standards relating to the environment.

Make efficient use of energy and natural resources. Maintain machinery, transport and other equipment so far as to minimise waste emissions and energy consumption.

Minimise waste and where practicable make sure that waste products are recycled.

Restrict the use of packaging to a minimum, and where possible maximise the use of recycled materials.

Control air and water pollution by the best available techniques.

Efficient use of transport.

Maintain the condition and appearance of the company premises.

Promote awareness amongst all employees of company policy and ensure their co-operation in implementing these standards and procedures.

Encourage supplies and customers to increase their awareness of company environmental policy and improve standards.

Regularly review our environmental standards and procedures and strive for continuous improvement in our performance, towards a standard that is greater than mere regulatory compliance.

Signed 

Mr Christopher Brown
Managing Director
Glass Northampton Limited
